

— SHARE WITH YOUR TEAM

Clear next steps. A helping hand for your fleet.

Gehlco brings driver records, testing, renewals, and document follow-ups into a connected workflow, with people who help move the work forward.

For fleet owners and safety managers

If your team spends time chasing files, checking who reviewed a record, and following dates across several lists, Gehlco gives that work a shared home.

Four connected parts of the work

- **Driver readiness:** next actions, supporting evidence, reviewed records, and history.
- **Testing and consortium support:** selections, testing records, results, and follow-up work.
- **Renewals:** upcoming obligations connected to prior completion and retained proof.
- **Documents and follow-ups:** files, receipts, questions, corrections, and reviewed updates.

Know who has the next step

Needs you shows the action for your team. **With Gehlco** shows work being handled or reviewed. **Completed** keeps the reviewed outcome and its history accessible.

Intake tools help organize information. People handle the important reviews and decisions. A file receipt, a help request, and a completed update remain distinct.

Start with the process you already have

Bring your roster, existing files, and the question your team keeps asking. Gehlco reviews the starting scope, company details, people, and programs with you before service activation.
